

Review methodologies: Rapid reviews, Evidence Gap Maps, Systematic reviews

Presenters:

Kashfee Ahmed, Katherine Dix, Petra Lietz, Pina Tarricone

Reviews of current knowledge and past research are essential for summarising and translating available evidence for policy makers, practitioners, researchers and funding bodies. Reviews can take many forms and have various ways of presenting, mapping, graphing and visualising results.

This seminar starts by providing an overview of different review types in terms of aim, scope, search strategy, study identification and screening, timeframe, coding and presentation.

It then illustrates three types of reviews through projects undertaken by the Australian Council *for* Educational Research:

- Building resilient education systems: A rapid review of the education in emergencies literature.
- Teacher Professional Development for Disability Inclusion in Low-And-Middle-Income Asia-Pacific Countries: An Evidence and Gap Map.
- A systematic review of intervention research examining effective student wellbeing in schools and their academic outcomes.

WHEN: Tuesday 23 November 2021

7:00 - 8:30pm (SA time); 4:30 – 6pm (WA time)

WHERE: ONLINE WEBINAR (via the MSTeams Platform)
